

RESEARCH INTERESTS	My research lies at the intersection of machine learning, computer vision, data science and healthcare, with a focus on physically and geometrically precise machine learning models with minimal human supervision. I aim to develop foundation models that can scale and extrapolate to advance AI's capacity for accurate, accessible, and transformative medical imaging and healthcare solutions.		
EDUCATION	University of California, Berkeley Ph.D. in Vision Science. Track : Computer Vision. Advisors : Stella X. Yu and Meng C. Lin . Thesis : Structure-Aware Representation Learning and Its Application to Healthcare Certificate in Teaching and Learning in Higher Education.	Aug. 2018 - May 2023	
	Xi'an Jiaotong University Bachelor in Electrical Engineering. Visiting student at UC Berkeley from 2017 to 2018.	Aug. 2014 - June 2018	
RESEARCH EXPERIENCE	California Institute of Technology <i>Postdoctoral Researcher in Computing and Mathematical Sciences</i> Advisor : Anima Anandkumar Topics : AI for science and healthcare, specifically representation learning for inverse problems and imaging with applications to lung and brain imaging with ultrasound and photoacoustic tomography	Pasadena, CA	July 2023 - Present
	University of California, Berkeley <i>Graduate Student Researcher</i> Topics : Real-world representation learning (learning from imperfect data, 3D visual representations and efficient learning), as well as their applications to healthcare (ML for ocular disease diagnosis)	Berkeley, CA	Aug. 2018 - May 2023
HONORS AND AWARDS	Finalist, Peripall Speaking Competition, Caltech Best Paper Award, Machine Learning for Health (ML4H) Symposium Vector Institute Fellowship (offered) Best Paper Award, Hong Kong Science & Technology Park (HKSTP) Best Paper Award, CVPR PBVS workshop Seagate Fellowship Outstanding Graduate Award, Xi'an Jiaotong University Top 10 Undergraduate Award, Xi'an Jiaotong University National Scholarship of China Meritorious Winner, the International Mathematical Contest in Modeling (top 8%)		2024 2023, 2024 2023 2019 2019 2018 2018 2017 2015 - 2017 2016
GRANTS (CO-AUTHORED)	NIH-R01, "AI Enhanced Lung Ultrasound Imaging in Acute and Chronic Disease" (submitted) NSF-2313151, "Lie Group Representation Learning for Vision" (200k) NIH-R21EY033881, "Towards a New Paradigm in Meibomian Gland Evaluation Using AI" (250k) BAIR Commons, "Scene Sketch to Photo Synthesis" Berkeley Deep Drive, "Learning Dynamic Point Set Neighbourhoods for 3D Object Detection"		2024 2023 2022 2021 2020
PREPRINTS	[P1] Beyond Closure Models: Learning Chaotic-Systems via Physics-Informed Neural Operators C. Wang, J. Berner, Z. Lin, D. Zhou, J. Wang , J. Bae, A. Anandkumar <i>In submission to Nature Communications.</i> [P2] Ultrasound Lung Aeration Map via Physics-Aware Neural Operators J. Wang , O. Ostras, B. Tolooshams, M. Sode, Z. Li, K. Azizzadenesheli, G.F. Pinton, A. Anandkumar <i>In submission to Nature.</i> [P3] Neural Operators for Accelerated Functional Ultrasound Imaging B. Tolooshams, J. Wang , L. Lin, T. Callier, K. Azizzadenesheli, R.A. Andersen, A. Anandkumar <i>In submission to Nature Methods.</i> [P4] Open-Vocabulary Monocular 3D Object Detection J. Yao, H. Gu, X. Chen, J. Wang , Z. Cheng <i>In submission to CVPR 2025.</i>

PATENT [1] Image Generation Based on a Multi-Image Set and Pose Data
A. Kheradmand, **J. Wang**, H. Arora
File number : P80654-US01 ; Date : March 20, 2023.

TEACHING **Guest Lecturer, Caltech**
Machine Learning and Statistical Inference (CS165) Winter 2024
Taught materials covering Bayesian and Neyman-Pearson detection, UMVU estimator and Cramér-Rao lower bound. Mentored student projects on diffusion models for inverse problems.

Graduate Student Instructor, UC Berkeley
Deep Neural Networks (CS182/282) Spring 2023
Designed course materials illustrating both fundamentals of deep neural networks (e.g. regularization, weights and gradients of CNNs at different layers) as well as advanced applications (e.g. to deep learning systems and biomedicine). Held weekly office hours. 400 students are enrolled.

Machine Learning (CS189/289) Fall 2020
Gave a guest lecture, designed real-world problem-focused homework and exams on EM algorithm, long-tailed distribution, research topics like medical imaging, etc., led discussion sessions, held weekly office hours and helped facilitate course projects. 400 students are enrolled in the class.

Visual Perception (VS205) Fall 2018 & Fall 2019
Led discussions and lab sessions to help around 70 students understand basic psychophysical and statistical methods in visual perception.

INVITED TALKS **Towards Real-World Representation Learning and Its Applications to Healthcare**

- Seminar at Stony Brook University May 2023
- Seminar at Northwestern University April 2023
- Seminar at Berkeley AI Research Lab April 2023
- Seminar at Vector Institute April 2023
- Seminar at California Institute of Technology Mar 2023
- Seminar at Duke University Jan 2023
- Seminar at Apple (Camera Incubation Team) Jan 2023
- Seminar at NVIDIA (Self-Driving Team) Jan 2023

Generate Photos and 3D Models from Sketches

- Bosch-ICSI Research Seminar Aug. 2022
- Seminar at Amazon (FitScience Team) June 2022

Redundancy and Compression in Deep Neural Networks

- Berkeley Oxyopia Seminar Nov. 2021
- Berkeley MRI Seminar Sep. 2021

MENTORSHIP Jin Yao, PhD at UVA. Active. (co-advised with Z. Cheng)
Armeet Jatyani, undergrad at Caltech. Active. (co-advised with A. Anandkumar)
Arushi Gupta, undergrad at Caltech. Next : CS PhD at Stanford. (co-advised with A. Anandkumar)
Aditi Chandrashekar, undergrad at Caltech. Next : CS PhD at Princeton. (co-advised with B. Toloo-shams and A. Anandkumar)

Tejasvi Kothpalli, undergrad at UC Berkeley. Next : PhD at UC Berkeley. (co-advised with S. Yu)
Martin Zhai, undergrad at UC Berkeley. Next : Master at Cornell University. (co-advised with S. Yu)
Shixuan Li, undergrad at UC Berkeley. Next : Master at Brown University. (co-advised with S. Yu)

SERVICE AND LEADERSHIP	Session Chair , Caltech Student-Faculty Program Summer Seminar Day	2024
	Member , Caltech AI Graduate Admissions Committee	2023
	Member , American Association for the Advancement of Science	2023 - Present
	Mentor , Berkeley AI Research Mentoring Program	2022 - 2023
	<i>Mentored underrepresented undergraduates and helped them get started in pursuing a career in AI.</i>	
	Member , Berkeley Diversity, Equity, Inclusion, and Belonging (DEIB) Committee	2022 - 2023
	<i>Helped organize the DEI book club and DEI movie nights for an informal environment where students can freely discuss their thoughts and views on DEI.</i>	
	Volunteer Teacher , Bay Area Scientists in Schools	2019 - 2022
	<i>Taught science lessons on AI and computers to students in public elementary schools.</i>	
	Vice President , Chinese Graduate and Postdoctoral Scholars Association at UC Berkeley	2019 - 2021
	Program Committee Chair , Bay Area Vision Research Day (BAVRD)	2019
INDUSTRIAL EXPERIENCE	<i>Fundraising, planning the conference schedule and overseeing the review of lighting talks and posters</i>	
	Conference & Journal Reviewer : CVPR, ICCV, ECCV, SIGGRAPH, NeurIPS, ICLR, ICML, AAAI, AISTATS, MICCAI, WACV, BMVC, ACCV, CPAL, ACM Multimedia, IEEE-TPAMI, IEEE-TIP, IEEE-TCSVT, IEEE-JBHI, IEEE-JSTARS, IEEE-Access, ACM Comp Surv., ACM TOMM, IJMLC, PLOS One, OVS, TVST, Heliyon, Current Medical Imaging, Scientific Reports, Contact Lens and Anterior Eye, Quantitative Imaging in Medicine and Surgery	
	Editor : Frontiers in Computer Science, Journal of Imaging	
	Program Committee Member , AAAI	2021, 2024
	Aizip	Cupertino, CA
	<i>Founding Member, Research Scientist (part-time)</i>	Oct 2020 - Aug. 2023
	<ul style="list-style-type: none"> • Led core projects towards robust, efficient and scalable real-world AI-IoT solutions • Worked on full-stack machine learning and delivered robust models and products to customers • Built the tiniest human detection system with robust performance under different lighting conditions 	
	Amazon	Sunnyvale, CA
	<i>Applied Scientist Intern</i>	May 2022 - Nov. 2022
	<ul style="list-style-type: none"> • Mentors : Dr. Himanshu Arora and Dr. Amin Kheradmand • Developed multi-view human reposing and virtual try-on system that beats state-of-the-art methods • The work became a patent and was integrated into the Amazon Virtual Try-On product 	
	Aibee	Palo Alto, CA
REFERENCES	<i>Research Intern</i>	May 2020 - Aug. 2020
	<ul style="list-style-type: none"> • Mentors : Dr. Song Cao and Prof. Silvio Savarese • Developed novel algorithms for fine-grained long-tailed vehicle recognition and improved minority class accuracy by 20% 	
	Sensetime	Shenzhen, China
	<i>Research Intern</i>	Feb. 2018 - Aug. 2018
	<ul style="list-style-type: none"> • Developed an RGBD-camera-based 3D portrait animation product, which was featured in Vivo's 2018 latest smartphone model • Developed efficient classification algorithms for long-tailed fine-grained data and ranked 6th in CVPR 2018 Fine-grained Visual Categorization Competition • Proposed novel deep networks for efficient point cloud detection and improved 4% performance
